Art Unit: 2652

1. Claims 19, 20, 27, and 28 are rejected under 35 USC 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise, and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

The disclosure relating to the pole structure invention clearly indicates that tantalum is only used in the "two part" seed layer configuration (see page 12 line 17- page 13 line 3). There is no disclosure of the use of tantalum where the seed layer is a single layer (see page 10 lines 17-23).

These claims are inadequately disclosed under 112 par.1 if read to encompass the use of tantalum by itself or the seed layer.

Alternatively, these claims are indefinite, misleading, and misdescriptive under 112 par.2 for failing to clearly indicate the configuration of the seed layer.

2. Claims 21, 22, 29, and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

SASKI, ROTTMAYER et al, and SHUKOVSKY et al are cited for their showings of pole structures.
